Not Just ProteinIt's Pure Protein

01 Required Quantity & Quality of Protein

Protein Hydrolysate 32gm/100gm

- High Protein content
- Predigested hydrolyse Protein (Branched-chain amino acids(BCAs), peptides, polypeptides, and denatured proteins)

02 Absorption & Digestion

Absorption

Almost completely absorbed 50% Faster absorption than isolate/concentrate protein

Digestion

Predisted form of protein obtained by chemical, enzymatic, and thermal hydrolysis of isolate proteins

03 GI TOLARENCE

- Isolate/ concentrate Proteins are not fully absorbed and not complete digest. (40-70)
- Unabsobed & Undigested protein cause Excessive intestinal gas, bloating, abdominal pain, cramps, reduced appetite, nausea, headache, fatigue and diarrhea

Not Seen with Protein Hydrolysate

04 Sugar Content

Sugar hampers the absorption of micronutrient & there for affects the amino acid concentraion in blood thus the sugar defeats the purpose of protein supplement

- **Purezza** contains no added sugar
